

Now Made Finer

This is a new version of the new 2.6 designed overhead cylinder head of the famous 75 engine with overhead valves and side exhaust valves. A revolutionary improvement in internal combustion engine design, this cylinder head ensures better performance than was previously possible. Your Rover P5B, powered by this amazing engine, has smoother more flexible, more silent and economical power than any other car. British engineering takes her great stride forward with the development of the Rover 75.
